
Clinical Research Informatics Tools

Posted by MpRocheMedvedovic - 2008/11/21 18:21

Hello,

As a follow up to the AMIA CRIWG meeting please find attached proposed discussion topic. I took a stab at following:

1. Develop list of Clinical Research Informatics (CRI) tools
2. Classify CRIs based on a set of criteria
3. Develop list of clinical trials processes
4. Cross-reference CRI tools with CRI processes and develop a graphical diagram

Your thoughts would be much appreciated.

Mark

Great start, Mark. I notice that Joe has also added to the list we have on our Wiki's CTMS page. This is great. I think this will be most helpful to people.

How about we keep fleshing this out on the Wiki?
